1KV Insulation Piercing Connector

According to EN50483 standard,

- Strong PA66 cover with 1.5 times torque force testing without problem.
- High hardness Al alloy or Cu teeth with tin plated.
- Stable shear head force keep $\pm 2\text{Nm}$.
- Same hardness of nut and bolt thread, prevent from thread broken.
- UV protected plastic.
- Hot dip, dacromet or chroming galvanization, prevent from oxidation and corrosion.
- Some type can be used for underwater of 6kv withstand voltage, and compact structure of PVC or rubber lining with teeth and body to prevent from leakage.

TTD Series 1KV Insulation Piercing Connector

Insulation piercing connector property: It is mainly used for branch connection, and grounding protection for 1KV, 10KV and 20KV.

1. Simple installation: Put the main wire and the branch wire directly on the right place without wire stripping. Tighten the shear head evenly by wrench.
2. Low resistance and low temperature-rise: The special bolts can ensure equal piercing pressure for superior electric contact and less wire damage, so that make sure the normal service life of the pierced wire.
3. Sealing structure with good insulation: tight insulated lining and enough compound to ensure the insulation function in good control when connector used outdoors.

Notice: 1. The conductors for installation should be under the connector range.

2. Put on insulated gloves, use insulated wrench during installation.
3. Do not re-use it after dis-assembly as its non-renewable character.

Installation: Insulation Piercing Connector

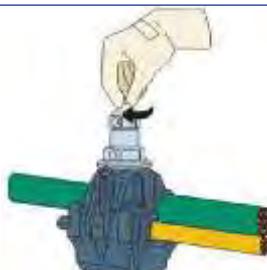

1. Adjust the connector nut to suitable location.

2. Put the branch wire in to the cap sheath fully.

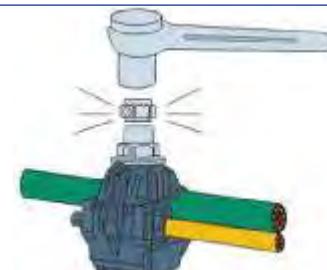

3. Insert the main wire, if there are two lays of insulated taly in the main cable, should strip a certain lenght of the first insulated lay from inserted end.

4. Turn the nut by hand, and fix the connector in suitable location.

5. Screw the nut with the sleeve spanner.

6. Screw the nut continually until the top part is cracked and dropped down.

Performance Testing

1. Mechanical performance: the grip force of the wire is 1/10 bigger than the break force of the lead, it complies with En50483.
2. Temperature rise performance: under the condition of big current, the temperature rise of connector is less than that of connection lead.
3. Heat circle performance: conforms to GB/T2317.3-2000, the heat circle trial standard for electric fitting.
4. Waterproof insulation performance: conforms to the relevant testing requirements in part 2 of GB/T13140.4-1998.
5. Resistance to corrosion performance: under the condition of acid and salt fog, it can do three times of fourteen days circle testing.
6. Environmental aging performance: under the circumstance of ultraviolet, radiation, dry and moist, expose it with change of temperature and heat impulse for six weeks.
7. Fire-proof performance: insulation material of the connector withstands glowing filament test. Conform to the requirement in chapter 4-10 of GB/T5169.4.

PS Series Suspension Clamp

The PS suspension clamp is designed for the installation and suspension of four core self-supporting LV-ABC cables to poles or walls.

- The clamp is made of hot-dip galvanized steel and weather resistant material.
- Equipped with shear head bolt. The clamp can be easily installed without damaging to the cable jacket.
- No loose parts.
- Standard: EN504483-3, NFC 33-040

ES1500, 1.1B Suspension Clamp

The ES1500 and 1.1B suspension clamp are used to hang LV-ABC cables on poles with the insulated neutral messenger.

- The anchoring bracket is made of corrosion resistant aluminium alloy.
- The clamp and movable link is made of weather resistant and mechanically reliable insulated polymer. Easy cable installation without tools.
- The neutral messenger is placed in the groove and loocked by an adjustable grip device to fit different cables sizes.
- Standard: EN504483-3, NFC 33-040

ABC Cable Fittings

922, 922B Suspension Clamp

Suspension clamp is designed to support of ABC cables on wooden and concrete poles as well as on the facility walls.

- The clamp and movable link is made of weather resistant and mechanically reliable insulated polymer.
- Easy cable installation without tools.
- The neutral messenger is placed in the groove and loocked by an adjustable grip device to fit different cables sizes.
- No loose parts.

CPTAU Pre-Insulated Bimetal Lugs

The CPTAU pre-insulated bimetal lug is used to establish connection between LV-ABC cable and electrical equipments. Palm is made of 99,9% pure copper and sleeve is made of 99,5% pure aluminum.

- Prefilled with jointing compound
- Standard: NFC 33-021, EN50483-4
- Water tightness test carried out at 6kV for 1 minute under water.

MJPB Pre-Insulated Bimetal Lugs

The MJPB pre-insulated connectors is designed for service and lighting cables.

- Standard: NFC 33-021, EN50483-4
- Insulation tube is made of weather and UV resistant polymer.
- Cross-section of conductor can be easily identified by the color code of rings.
- Elastomeric ring and pre-filled grease enable super waterproof performance.
- Water tightness test carried out at 6kV for 1 minute under water.

H Type Clamp

JH clamp is a kind of connection clamp used for all kinds of high and low tension & non-tension wire, suitable for steel core aluminum wire (LGJ), aluminum stranded wire (LJ), aluminum wire overhead insulated cable (JKLYJ), core aluminum wire overhead insulated cable (JKIGYG), copper wire and other materials free to connect.

Structure Feature

- The resistance is small, low temperature, saving energy, safe e reliable.
- Clamp is made of high strength aluminum alloy, safe e stable.

JXD Wedge Clamp

JXD series wedge clamp is suitable for no-bearing connection of conductor for overhead distribution circuit, also for mating aluminum connection, overhead insulated aluminum wire, insulation sheath or clamp, it takes effect on protection.

Structure Feature

- It can save energy.
- Good contacting performance, big contacting surface for wedge elastic damping and conductor stable clamping torque the rate of DC resistance is 0.85~0.9.
- Strong overload capacity, wedge elastic damp and overload capacity is 2 times of rated current.
- Good thermal circle performance, operating under the rate of DC resistance for less than 1 all the time.
- Gain the aim of free maintenance, no-failure and longlife.
- Suitable for kinds od conductor composite, strong applicability, mating insulation sheath, it realizes circuit insulation.

APG, Aluminum Parallel Groove Connector

The APG parallel groove clamps are designed to connect two aluminum conductors. Advanced forging technology enhances the mechanical strength of the clamp.

- APG series products are applicable for 30KV and below.
- Special designed screw hole and arc shape of the body allow clamp to adjust to different cable size on each side.
- Clamp body is made of aluminum with excellent electrical conductivity.
- Gross-grooved clamp channels enhance both mechanical pull out strength and electrical conductivity.
- Material of bolt and nut depend on customer request. Options include hot-dip galvanized steel and stainless steel. Pressure pad is applied to achieve uniform pressure along the clamp.

NXL, Tension Clamp

NXL series strain clamp is suitable for distribution wire up to 10KV, fixing the aerial insulation aluminum conductor or naked aluminum conductor on the rotate angle or insulator of terminal strain pole, and then fixing and tightening the aerial conductor.

Structure Feature

- Choose the unmagnetic character high-intensity oxidate-resistant aluminum alloy. No waste electric energy.
- Wedge-locked structure, easy installation.
- An arc embrace the most part, conductor can't change.
- Large grip strength.

Insulation Cover Performance Feature

Fiber Storage Units

Fiber Storage Units are used to storage mounting of cables. It can be used overhead on wire or mouting on pole or wall.

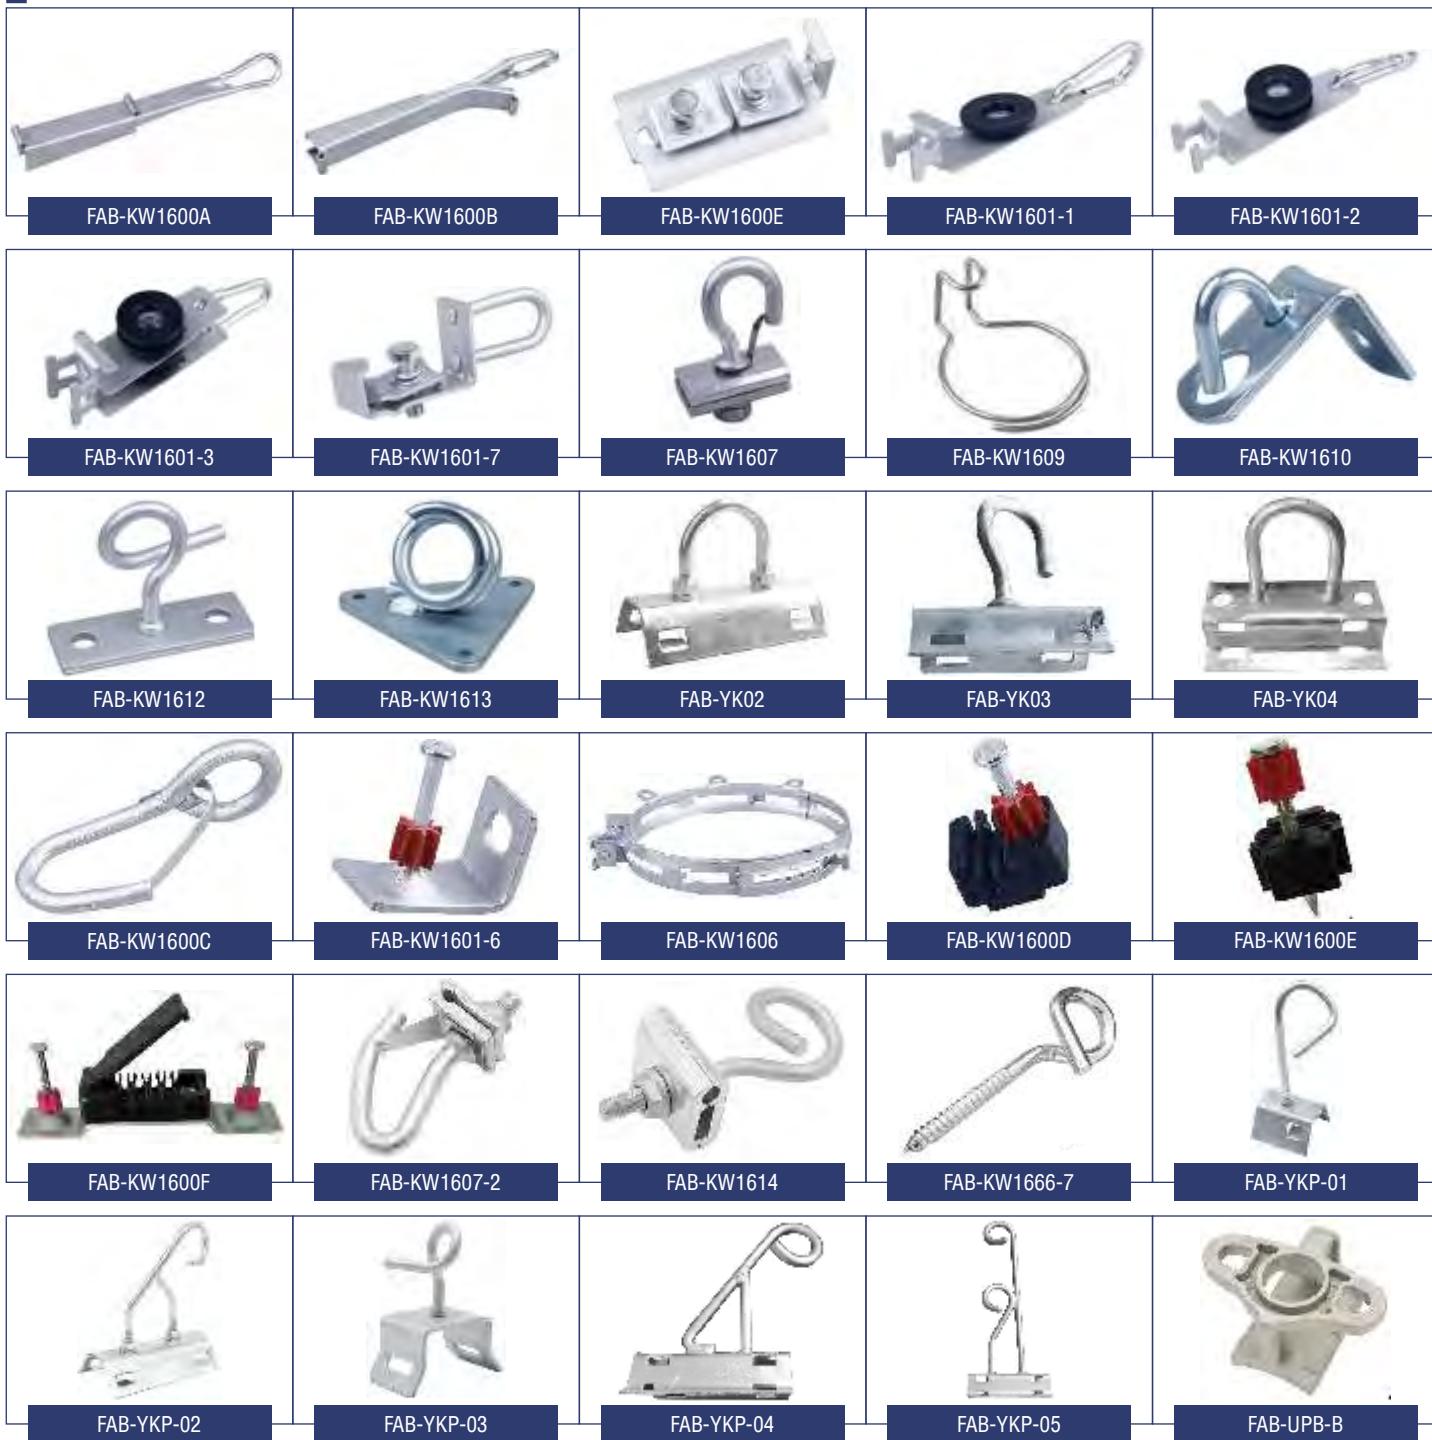

Advance:

- Cable can be storage alone inside channel.
- The channel is designed to tie the cable mounting on it, ice and water leaf was also be designed.
- It can be hanger on steel wire. Hanging part (Bolts, nuts, whashers) was designed according strand clamps or cable fixed.
- Cable can be easy to tie, wrap in slot of channel for securing.
- Constructed from PP material, UV material also can be used if need.

ADSS Connecting Clamp & Bracket

Stainless Steel Banding Strap, Accessories & Tools

Stainless Steel Strap & Cable Ties

Main Features:

- Stainless steel has good anti-corrosion and anti-oxidation functions, and different grades of stainless steel can adapt to various environments.
- The surface of the steel strip is marked with a metric mark every 10cm. The user can use the mark to accurately measure the required length, improve construction efficiency and reduce waste.
- It needs to be used with stainless steel buckles. It can be used in various sizes for different environments and tension requirements. In theory, it can provide up to 1.5 tons of bundle tension.
- Usually use economical carton packaging, users can also choose portable plastic box packaging, easy to carry out emergency maintenance and high altitude operation of the facility.

Band Strap Installation

1. Cut a length of stainless cable tie according to the actual use, put the buckle to one end of the cable tie and reserve a length of about 5cm.

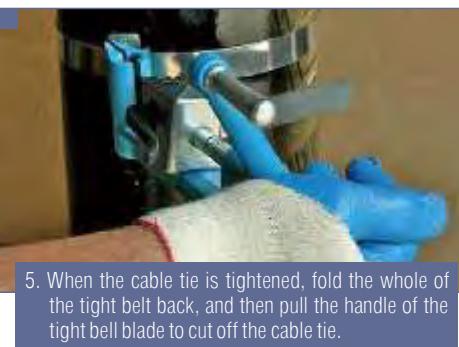

2. Bend the reseved cable tie to fix the stainless steel buckle.

3. Put the another end of the stainless steel cable tie as picture shows, and set aside 10cm for the tool to use when tightening.

4. Tie the straps with the strap presser and start to shake them slowly, until you make sure they are tight.

5. When the cable tie is tightened, fold the whole of the tight belt back, and then pull the handle of the tight bell blade to cut off the cable tie.

6. Hammer the two corners of the buckle with a hammer to catch the last reserved tie head.

KW-RA/RT Series Plastic Junction Box

Body Material: ABS

Stopper Material: PVC

Protection Level: IP65

Application: Suitable for indoor and outdoor electric communication, fire fighting apparatus, iron and steel smelting, petrochemical industry, electron, power system, railway, building, mine, air and sea port, hotel, ship, works, waste water treatment equipment, environmental equipment and so on.

Installation:

1. Inside: There are the installation holes in the base for circuit board or din rail.

2. Outside: The products can be directly fixed on the wall or other flat boards with screw or nails via screw holes in the base.

Outlet Hole: Cutting a hole in the PVC stopper as related cable size or installing cable gland to get better waterproof performance.

KT Series Plastic Junction Box

Body Material: ABS or PC

Protection Level: IP67

Application: Suitable for indoor and outdoor electric communication, fire fighting apparatus, iron and steel smelting, petrochemical industry, electron, power system, railway, building, mine, air and sea port, hotel, ship, works, waste water treatment equipment, environmental equipment and so on.

Installation:

1. Inside: There are the installation holes in the base for circuit board or din rail (more than 2pcs of M4 brass nuts have been in each other).
 2. Outside: The products can be directly fixed on the wall or other flat boards with screw or nails via screw holes in the base.
- Outlet Hole: Holes can be opened on the box as customer's requirements, and installing cable gland can bring with better waterproof performance.
